

PRODUCT BULLETIN

ISSUE/DATE:	August 9, 2010	BULLETIN NUMBER:	AQ080910
SUBJECT:	Ballast Update	PRODUCT LINE:	Aquafine
TOPIC:	ELECTRONIC MULTI-VOLT HIGH OUTPUT BALLAST REVISIONS		

OVERVIEW / DESCRIPTION

Aquafine Corporation has qualified new multi-volt electronic ballast for low pressure high output (LPHO) configured equipment.

DETAILS

The new multi-volt ballast PN 43474-1 is capable of operating Aquafine HE or HX series lamps.

Features include:

- 120-240 VAC 50 / 60 Hz
- UL and CSA approved
- Operate 2 lamps with 1 ballast

Please note that this ballast is a direct replacement for the 40328 and 41634-1 ballast.

Aquafine has been manufacturing equipment with this new multi-tap ballast effective September 1, 2007.

Aquafine will continue to support legacy equipment configured with PN 40328 and 41634-1 ballasts offering PN 43474-1 as a direct replacement.
